Volume 45 1994

Subject index

Adsorbed anions in soil, two-path self-diffusion model, 145
Adsorption of radiocaesium, 409
Aggregates, measuring the sorptivity of, 269
  tensile strength of, 23
  water uptake by, 127
Aggregation of a sandy loam under long-term pasture, 459
Alpechìn, heavy metal retention in the presence of, 71
Alkali dissolution in determination of plant opal content, 379
Aluminium hydroxides, phosphate sorption by, 37
Amino acids in peat, 387
Amorphous aluminium hydroxides, phosphate sorption by, 37
Analytical transmission electron microscopy in pyromorphite determination, 393
Anions in soil, two-path self-diffusion model, 145
Annual input of organic matter, 167
ATEM in pyromorphite determination, 393
Australian soils, collapse and strength, 15, 23, 519
  slaking, 273
Author index, 521

Biogenic greigite in soil, 97
Book reviews, 233, 511
Boolean model simulating gas diffusion, 483
British soils, slaking, 273

Cadmium, ionic-strength effects on the sorption of, 419
  pH effects on the sorption of, 419
  solid–solution equilibria with lead, 59
Cadmium availability, fertilizer effects on, 159, 519
Calibration of gamma-ray soil density gauges, 105
Carbohydrate signature, land-use effects on organic matter composition, 449
Chemical weathering rates in Scottish forest soils, 327
Chronofunctions, modelling soil, 219
Coal mine soils, mineral N in restored, 311, 319
Cobalt, scale-dependent correlation with copper, 79
Colwell soil-test phosphate, effect on of storage, 53
Compaction, modelling soil distortion during, 117
Conservation of mineral N in restored opencast soils, 311, 319
Constant cell volume triaxial tests, 249
Copper, scale-dependent correlation with cobalt, 79
Coregionalization of trace metals in the Swiss Jura, 205
Corrigenda, 519
Coupled diffusion and oxidation of ferrous iron, 369
Critical state parameters and constant volume triaxial tests, 249
Crop evapotranspiration, error propagation in simulating, 303
Cylindrical stress load paths, modelling soil distortion, 117

Determination of plant opal content, 379
Determination of sulphhydryl groups in soil humic acids, 183
Diffusion from instantaneous sources, 479
Diffusion of ferrous iron, 369
Draining, structural collapse on, 15

Effect of freeze/thaw episodes on phosphorous chemistry, 353
Effect of storage on estimating phosphate, 53
Effect on Colwell soil-test phosphate of storage, 53
Effects of soil structure on protozoa, 285
Electrical conductivity, estimating salt content from, 153
Energy peak drift and calibration of soil density gauges, 105
Error propagation in simulating evapotranspiration, 303
Estimating salt content from electrical conductivity, 153
Evaluating maps to predict soil water properties, 293
Evapotranspiration, error propagation in simulating, 303
EXAFS in pyromorphite determination, 393
Extended X-ray absorption fine-structure spectroscopy in pyromorphite determination, 393

Ferrimagnetic Fe_3S_4 in soil, 97
Ferrous iron, coupled diffusion and oxidation of, 369
Fertilizer effects on heavy-metal availability, 159, 519
Fertilizer effects on properties of a sandy loam, 257
Field-measured redox potentials, 31
Finnish mineral soils, retention of vanadium by, 361
Forest podzol and incorporation of monoacids, 175
Forest soils, chemical weathering rates in, 327
Free amino acids in peat, 387
Freeze/thaw episodes, effect on phosphorous chemistry, 353
Functional model of soil porosity for gas diffusion, 135

Gamma-ray soil density gauges, calibration of, 105
Gas chromatography in identification of free amino acids in peat, 387
Gas diffusion, model of soil porosity for, 135
  simulating, 483

Greigite in soil, 97
Groundwater–surface-water interface, redox potentials, 31

Hardsetting, structural strength and collapse, 15, 23, 519
Heavy liquid separation in determination of plant opal content, 379
Heavy-metal retention in the presence of alpechìn, 71
Heavy-metal availability, fertilizer effects on, 159, 519
Hematites, phosphate sorption by, 45
Hillslopes, tillage and soil redistribution on, 469
Humic acids, sulphhydryl groups in, 183
Hydraulic conductivity and soil structure, 493
Hydromorphic forest podzol and incorporation of monoacids, 175

Incorporation of natural monoacids, 175
Input of organic matter, 167
Ionic-strength effects on the sorption of cadmium, 419
Ionic-strength effects on the surface charge of soils, 419
Irrigated pasture, nitrogen dynamics of urine in, 439

Jura, coregionalization of trace metals in the, 205

Land-use effects on organic matter composition, 449
Lead, solid–solution equilibria with cadmium, 59
Letter to the Editor, 509
Lignin, land-use effects on organic matter composition, 449
List of referees for 1993, 237
Loam, fertilizer effects on properties of, 257
  manuring effects on properties of, 257
Loam under long-term pasture, aggregation of, 459

Manuring effects on properties of a sandy loam, 257
Maps, prediction of soil water properties, 293
Mass spectrometry in identification of free amino acids in peat, 387
Measurement of soil gas diffusivity, 3
Measuring the sorptivity of aggregates, 269
Metals in the Swiss Jura, coregionalization of, 205
Mineral N in restored opencast soils, 311, 319
Mineral soils, retention of vanadium by, 361
Mine-waste contaminated soils, identification of pyromorphite in, 393
Model of soil porosity for gas diffusion, 135
Model simulating gas diffusion, 483
Modelling soil chronofunctions, 219
Modelling soil distortion during compaction, 117
Monoacids, incorporation of natural, 175

Natural hematites, phosphate sorption by, 45
Natural monoacids, incorporation of, 175
Nitrogen dynamics of animal urine in irrigated pasture, 439
Nitrogen in restored opencast soils, 311, 319
NMR and phosphate in urban sewage sludges, 403
Non-rhizosphere soil solutions, 431
Nuclear magnetic resonance and phosphate in urban sewage sludges, 403

Olive-oil industry, heavy metal retention in by-product, 71
Opencast soils, mineral N in restored, 311, 319
Organic matter, annual input of, 167
Organic matter composition, land-use effects on, 449
Oxidation of ferrous iron, 369

Pasture, aggregation of a sandy loam, 459
  nitrogen dynamics of urine in, 439
Peat, free amino acids in, 387
pH effects on the sorption of cadmium, 419
pH effects on the surface charge of soils, 419
Phosphate, effect of storage on estimating, 53
Phosphate in urban sewage sludges, 403
Phosphate sorption by natural hematites, 45
Phosphate sorption by synthetic amorphous aluminium hydroxides, 37
Phosphorous chemistry, effect of freeze/thaw episodes on, 353
Phosphorous response in tropical soils, 337, 345
Picea abies, soil development under, 193
Plant opal content, determination of, 379
Podzol and incorporation of monoacids, 175
Polluted soils, solid–solution equilibria of lead and cadmium, 59
Porosity, model for gas diffusion, 135
Protozoa, effects of soil structure on, 285
Pyromorphite determination by ATEM and EXAFS, 393

Radiocaesium, adsorption of, 409
Redox potentials at the water table, 31
Retention of vanadium by mineral soils, 361
Rhizosphere soil solutions, 431

Salt content, estimating, from electrical conductivity, 153
Sandy loam, fertilizer effects on properties of, 257
  manuring effects on properties of, 257
Sandy loam under long-term pasture, aggregation of, 459
Scale-dependent correlation between copper and cobalt, 79
